Student Info: Will contain student information which he has added while creating Application Education section for that particular university. e.g. Degree year, CGPA etc.

One thing which need to be confirmed is student-id which Is part of Degree, should we get it during application process or should be get it from student added documents

Issuing Univ detail: Univ detail would come from the student filled application as well that from which country, city and city that univ is located.

Further information e.g. contact info, telephone number etc would either be
- Get from our own DB of universities
    - Our Data team work
    - contact student

Notes/Log: will reflect all the history about the specific application process from sending message to all the action which would be performed. In notes section admin user can enter detail about the response esp. in case of verify by phone

Verify-Screen:

From this screen, admin user can send message to the univ. This message will be sent from a registered address and each message would have a particular ID, so if a response would come that could be picked here.
